To

Hon'ble Chairman

Group of Twenty

Camp Udaipur, (Rajasthan)

India.

Respected Sir,

The central idea of this appeal emphasises that the human community is facing the most threatening life or death challenge of climate change ----in its history. The basic cause of this crisis , in our view rests, with the prevailing unjust and irrational corporate social system, while the immediate one lies in its anti-environment and anti-human corporate policies—with the sociological reason residing in Adam Smith's irrational economic principle that "man is selfish by nature"—a proposition contrary to the reality of man's bio-social character. A realistic answer in these crises, in our view, can only come from a Nature-Human Centric Agenda.

Your goodself is requested that a copy of the enclosed appeal be provided to each member of G20.

With highest regards and best wishes and thanking you in anticipation.

Yours Sincerely

Didar Singh, *President* Dated : 04-12-2022
Nature-Humen Peoples Movement, INDIA.

An Appeal

The human clock has since been ticking. It has been continuously flashing red signal varying from time to time. In nutshell, human community in 21st century is challenged by de-humanisation—in all social spheres and climate crisis—in all environmental components

Present state of Group of Twenty: the G20 is a forum of twenty largest economies in the world that meets regularly to discuss the most pressing issues facing the global economy, some time other matters with a vision of Money and Market. Such as: Energy supply, Food Security, Climate Change, Health, Digitalization, Geo-political Rifts, inflation or price rising etc.. Together, the G20 accounts for more

than 80 percent of world GDP, 75 percent of global trade and 60 % of the population of planet.

Global Snaring of Developing Countries: Since the start of the Pandemic, poor countries have had to shell out US $ 113 billion to their rich G20 creditors country, during a time that four times more people died of Covid in poorer countries than rich ones.

G20 countries are receiving US $136 million every day in debt repayment from the world's poorest countries at that time when 828 million people are facing hunger.

In 2021, on average , poor countries were forced to spend 27.5 percent of their budgets on debt repayment –four times more than on health sector and 12 time more than on social protection. Even the public climate finance they are getting from rich nations, including many in G20, are 71 percent loans.

The G20 is home now to 89 percent of all billionaire wealth in the world at around US $10 trillion. Energy and food billionaire are currently getting richer by a half-a-billion dollars a day. The world's food traders made record profits and food and agribusiness billionaires increased their collective wealth by US $382 billion over the past two years and huge profits during Ukraine war.

The United Nation has appealed for US $17.1 billion in humanitarian food security assistance for 2022 but so far donors have only given US $7 billion –such is the 'cruelty in corporate humanism'. The poorest half of the global population owns just Euro2900 (in purchasing power parity) per adult, while top 10 percent owns roughly 190 time more.

As per Oxfam surveyed 143 countries out of 161 nations froze tax rates on their richest citizens, and 11 countries even lowered them. Corporate tax dodging also continues on an industrial scale with an estimated one trillion dollars of corporate profits shifted to tax heavens in 2019.

In Sum—**A System increasing billionaire cannot decrease Dehumanisation**

Corporate sector as the Generator of this Deadly Challenge (climate Crisis),

Cannot be its Solution Maker

Global carbon dioxide emissions reached a level of 38.0 billion tonnes in 2021. The G20 nations contributed 81 percent of these emissions. The largest carbon dioxide emitters in G20 members were China, the USA and the EU.

Despite their promises G20 countries have subsidised fossil fuel companies over $3.3 trillion between 2015 and 2021. Many nations has increased subsidies—Australia- 48.2%, US- 36.7%, Indonesia- 26.6%, France- 23.8%, China-4.1%, Brazil-

3.0%, Mexico-2.6%, India has 9 times more subsidy than clean energy in 2021-22. ***(theprint.in)***

Looking back: beginning from 1972 the Stockholm conference, followed by Rio-Summit in 1992, Kyoto summit bring out Kyoto Protocol in 1997, Jonesburg Sustainable Development summit 2002, Bali conference in 2007, Copenhagen summit in 2009, Paris ('perish') conference in 2015 scuttling Kyoto Protocol, COP 26 in Glasgow twisted phasing – out coal to phasing down and main agenda on the table of COP 27 was shifted to Loss and Damage, where US president did not focused on Carbon Emission but advocated for methane emission. Global human community can easily view the zero sum outcome of twenty seven exercises devoted to Climate Crisis.

Nature-Human Centric Peoples Movement's assessment is that

it is going to be very extremely challenging future

- The challenge of global warming , the most deadly for human community, finishing it for ever
- The increasing population which has reached 8 billion on earth planet.
- The agricultural crisis due to extreme environmental events and human factors. Decrease in the area of cultivation due to land-use change policies.
- Decreasing the availability of pure drinking water causing human health crisis.
- Spread of fatal and irremediable disease

Nature-Human Centric Agenda Comprises

Two Fundamental Factors and Following Basic Principles

Two Fundamental Factors: Nature (or environment) and human community are two fundamental forces of the existing system of bio-life on our earth, human community is a fundamental factor, because it is the only bio-social species on the planet. All other bio-species are only biological because they are characterised only by their self-interest and have no social interest. Thus human community alone can take into account the interests of all bio-species existing on our planet.

Basic principles: *Environmental sustainability at all places and times even at the cost of GDP.*Establishing of a strong bond of brotherhood among the people,*Empowerment of the people in place of corporate capital supported corrupt political parties and business circles, *Social security to every deprived and needy person, *The rationalisation of irrational income differences in the proportion of 1:5 ratio, *All round transparency, * Step by step democratic change in the power structure and the functioning of UN and other international organisations and nation-state.

. Nature-Human Centric Peoples Movement appeals all the members of G20 to proceed from two fundamental factors guided by basic principles following agenda be made top priority

1) Change defence and foreign affairs system and policies
2) Stop stock market operations in each countries as well as on the world scale which create billionaire without any investment and creating any job.
3) Adopt a new development model based on the empowerment of workers and ordinary shareholders
4) Prevent all black money and concealed trading operation
5) Follow a new cooperative farming system
6) Terminate all unfair trading in each market—from the village, district, regional, nation-state to the world level.
7) Have a new model of informal work by the corporatization of all informal trading activities.
8) Invest all world saving in generating clean energy.
9) Use the energy to reconstruct our planet to change sea water into drinking water, irrigation operation, making new glaciers, saving the different environmental spheres as well as promoting modern natural agriculture and knowing the science of earthquake control.
10) Formulate a new policy of population control within quarter of century.
11) Make research to know the science of other solar systems and their planets, black hole phenomena, our galaxy and all other galaxies.

G20 mantra is –One Earth, One Family, One Future

8 billion peoples mantra is –One planet, One Environment, One Human Community,

One Common Home for All Bio-beings and One common challenge

of Life or Death for All in Future
